By the way, the amount of data you can save in a PDF can be saved in MB or KB. You can also add a Watermark to your document. For this purpose, you can select the text style, color and text (file, URL, e-mail, IM, etc) and the transparency (a value from 0 to 100). After saving the document as PDF, you can print it to a single or a pair of printers. The dual print option allows you to print more than one page at once while the single print option allows you to print just one page at a time. You can also edit the PDF document after the conversion has been
